

5kV/8kV/15kV XLPE Insulated Mining Cable, Type MP-GC

Construction: The tinned copper conductor is covered by an extruded semi-conducting compound. Insulation is cross-linked polyethylene(XLPE) with an extruded semi-conducting compound. There is a copper tape over each conductor as metal shield. Identification of power conductors are black, white and red. The ground check conductor is yellow. The grounding conductor is bare annealed copper. Three shielded conductors are assembled round in a helical configuration with two uninsulated ground wires, one yellow insulated ground check. and sheathed with black PVC.

Application : Type MP-GC cable is suitable for use in medium voltage distribution circuits for permanent installations in bore holes, shafts, open pits, strip mines and tunnels.

Rated Voltage: 5kV/8kV/15kV.

Operating Temperature: Max permissible continuous operating temperature of conductor shall not exceed 90°C.

Bending Radius: 12D, D = Actual outer diameter of cable (mm)

Standard: ASTM B3, ASTM B33, ICEA S-75-381 or other standards required by customers.

Packing: Steel/Wooden Reel, Wooden Reel or Steel Reel.
